

Matthew Brown is a New York based energy engineer currently pursuing an MBA in Entrepreneurship at Pace University. Matthew received both his BS in Aeronautical Engineering and MS in Mechanical Engineering from Clarkson University in Potsdam, NY. As a graduate student he won the Outstanding Teaching Award for instructing a course on aircraft design and while at school his field research helped to improve the efficiency of small wind energy systems. After graduating he established the technical infrastructure for Warner Energy, a startup renewable energy company in Syracuse, NY. Matthew has learned from experts in the energy industry while employed at GE Energy, Goodrich, and most recently, Johnson Controls, the worldwide leader in building energy efficiency where his clients include The Empire State Building, The Port Authority of NY&NJ, and American Airlines. He recently received the Above and Beyond award from Johnson Controls as recognition of excellence in carrying out all stages of energy efficiency projects from design to implementation and through to financial and energy savings results. Matthew has a passion for environmental stewardship, and promotes a philosophy that businesses make more than profit to be considered successful.
